

# PORTFOLIO 26

# Rethinking Responsibility.

We know the immense trust families place in us – and we take that seriously. For over four decades, we have developed products that combine safety, comfort, and design. But in a changing world, that alone is no longer enough.

That's why we go further: taking even greater responsibility for our little ones – and for the world they are growing up in. Sustainable materials,

forward-looking technologies, and uncompromising quality are not extras for us; they are part of our promise.

What remains? Our roots. Our passion. Our drive to create the very best for children and parents.

What's coming? New ideas, new ways, new generations – with Osann.

### Time for something to change – now with Top Tether!

The Taos360 boasts a real special feature: Thanks to the Top Tether attachment at the base, the seat, which grows with the child, can be rotated to suit all sizes. For kids and parents this means an effortless change from the rear-facing to the forward-facing position and easy getting in and out of the car.

But that's not all: The all-rounder will accompany mini from birth until the end of the child seat requirement.

Thanks to its 11-step height-adjustable headrest and four adjustable sitting and resting positions, the little passengers will find the right seat in every size range. In the beginning, an additional pillow and a removable comfort insert will ensure optimal support.

Taos360 allows mini to ride rear-facing up to 105 cm; switching to the forward-facing position is only possible from a body height of 76 cm at the earliest.

### Warming

In this mode, the back and seat area of the child seat is heated. If the inside of the seat reaches a temperature of 25 °C, the heating is reduced and kept constant.

### Cooling

In this mode, warm air is extracted from the child seat on hot days. This creates a cooling air circulation, which means that the little passenger sweats less.

### Automatic

In this mode, the system itself decides when to heat or extract warm air. Heating takes place automatically at temperatures below 5 °C and warm air is extracted at temperatures above 30 °C.

**Our Flux Isofix eXT – the perfect combination of safety, comfort and flexibility.**

The i-Size child car seat offers a 14-position height adjustable headrest, a removable comfort insert and an automatic 5-point harness system that grows with the child. It is suitable for small passengers up to a height of 120 cm and a maximum weight of 23 kg. Alternatively, it is possible to switch to securing with the vehicle's 3-point harness from a height of 100 cm; the 5-point harness can be easily stowed in the child car seat.

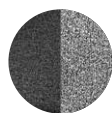

A real highlight: Special protectors on the headrest provide increased side impact protection and make riding in the Flux Isofix eXT particularly safe. In addition, an integrated sensor assists in the correct installation of the seat.

### Hands up for FeetUp!

Especially during long car journeys, a feeling of numbness quickly spreads in children's legs. In order to prevent this and to provide more comfort for the little darlings, our car seat protective underlay FeetUp was developed. It is universally suitable for all car seats and vehicles.

The integrated footrest can be adjusted in two heights by the zipper and is therefore suitable for children up to six years of age. In addition, the FeetUp protects your car seat from pressure points and dirt. The extremely durable material can be simply brushed off.

## 05 Home & Travel

**The world's first completely ventilated children's travel bed: our Fresh Air from Kid's Alm!**

The patented and innovative ventilation system in the head and foot areas and the open base prevent rebreathing of carbon dioxide, which can be responsible for sudden infant death syndrome. Moisture and mould don't stand a chance of forming thanks to the constant circulation of air, which is provided by the high-quality wooden slatted frame that is covered with mesh fabric mattress.

For little adventurers, the loophole at the foot end can be opened with a zip so they can climb out of bed on their own. The innovative Fresh Air children's travel bed has several clever features, which ensure restful sleep when travelling.

## 01 Child car seats

**Safe on board right from the start –  
with our Flame360!**

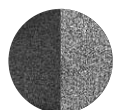

The i-Size child car seat offers your little one a comfortable space from birth up to a height of 150 cm. A comfort insert and an additional head cushion ensure optimum support even for the smallest passengers. Practical: the headrest and the 5-point harness system simply grow with the little ones.

In the 100 to 150 cm size category, the belt system is simply stowed in the seat and the seat is secured with

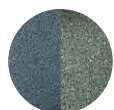

the car's 3-point belt. The 360-degree swivel function also makes it easier to get in and out from both sides. Incidentally, experts recommend transporting children against the direction of travel for as long as possible – in our Flame360, this is even possible up to a height of 105 cm.

**Our Boogy 2 – compact, light as a feather and equipped with many comfort features!**

It's not just its elegant design that makes this agile sports buggy stand out. It also handles easily: Our Boogy 2 can be folded up into a small and handy bundle in seconds with just one movement, easily fitting into any car boot. The backrest can be adjusted using a tension strap to an absolutely flat lying position. This means that your little one can rest, relax and enjoy a nap, as the spring-mounted wheels practically glide over the ground too.

Reflective highlights on the wheels, canopy and shopping basket provide additional safety as soon as it gets dark. Our loyal companion is also now available in a new design!
